I'm a proactive, resourceful professional with great interpersonal skills. I'm self-taught and passionate about programming and technology. As a web developer, my unique approach combines technical knowledge, dedication to challenges and the ability to develop applications and systems that not only meet the needs of each project, but also exceed expectations.

Skills

- Javascript
- ReactJS
- NextJS
- VueJS
- NodeJS

- Typescript
- PHP
- SCSS
- PostGreSQL
- MySQL

Experience

2020 – CURRENTLY
FullStack Web Developer
development of web projects and applications. Database with postgresql. Front-end development with Next.js and Vue.js. Back-end development with Express and Node.js

---

Education

2023 - 2027
Bachalor in Information Systems / IBMR
2020 - 2024
### FullStack Web Development / Udemy
2024
React Native, Next.js, Vue.js, TypeScript / Udemy

About me

When I got my first computer, I was immediately drawn to the fascinating world of technology. Recently, I made a significant decision: to transition my career and finally pursue my dream of working in programming. As a self-taught individual, I am always seeking new knowledge and challenges. This thirst for learning has led me to web application development. I began my journey with HTML and CSS, and upon discovering the potential of JavaScript, a new passion emerged. I'm constantly evolving in this language, deepening my knowledge and exploring libraries and frameworks such as React, Next, and Vue.js. Additionally, I strive to integrate these skills with backend development, utilizing tools like Express, Nodejs and TypeScript, and working with databases like PostgreSQL and MySQL. This journey of continuous learning not only empowers me to create dynamic and efficient web applications but also inspires me to constantly seek new challenges and opportunities for growth.

Annexes

FullStack Web Development - Udemy

1. Certificado de Desenvolvimento Web FullStack

ReactJS, React Native, TypeScript Course - Udemy
